Subject: Comments RE: Docket No. TMD 04-01
Attachments: ATTACHMENT.TXT

CCOF is pleased to see many of these materials progressing through the National List process. Notably, the addition of Ferric Phosphate is important to many organic growers. However, CCOF believes that the annotations for processing materials proposed for addition to 205.605(b) should be rewritten in light of recent legislative changes to the Organic Foods Production Act of 1990.

Sincerely,
Peggy Miars
